

DYNAMIC ENERGY MANAGEMENT PLATFORM

EnviroRad Smart
Radiator Control

CONFIDENTIAL

UNIVERSITY OF OXFORD

IT'S A COMMON ISSUE ACROSS MULTIPLE PROPERTY SECTORS

Education

Healthcare

Hotels

Offices

ANNUAL ENERGY CONSUMPTION

78,000

Tons of
CO2 emitted

£12M

Spent on heating
energy

INVESTIGATIONS DISCOVERED

70%

Underutilisation
of rooms

40%

Energy wasted

HUGE OPPORTUNITY COST

£5M

NOT spent on
medical research

ISSUE: WASTED HEATING ENERGY IN COMMERCIAL AND PUBLIC SECTOR BUILDINGS

CAUSE

1. UNDERUTILISED ROOMS
2. TRADITIONAL WHOLE-BUILDING "ON/OFF" BOILER OPERATING REGIMES
3. NO DYNAMIC ROOM-BY-ROOM HEATING CONTROL IN 99% OF BUILDINGS

Buildings heated to maximum requirement irrespective of room occupancy, true need or individual preference.

EFFECT

1. WASTED ENERGY
2. UNNECESSARY COSTS
3. UNNECESSARY CARBON EMISSIONS
4. UNCOMFORTABLE WORKSPACES

THE SOLUTION: STOP HEATING EMPTY ROOMS!

* IoT, Cloud, AI optimisation, Machine Learning algorithms, LoRaWAN long-range communication, energy harvesting, QR codes/webapps,

COMBINE LOW RISK, EXISTING
ADVANCED TECHNOLOGIES*

TO CREATE A SIMPLE TO USE
DYNAMIC ENERGY MANAGEMENT
PLATFORM

TO ONLY HEAT ROOMS ACCORDING
TO OCCUPANCY AND NEED

SOLUTION: USE AN INTELLIGENT ENERGY MANAGEMENT PLATFORM TO STOP HEATING EMPTY ROOMS

**BUILDING
MANAGER'S
DASHBOARD**

**INTELLIGENT
CONTROLLER**

**IN-ROOM QR
CODE**

INTELLIGENT CONTROLLER

**EASY & RAPID
DEPLOYMENT
(1min/TRV)**

- No wires, no mess, no disruption
- No building regs or LBC required

**ROBUST
COMMUNICATIONS WITH
LoRaWAN TECHNOLOGY**

**ENERGY HAVESTING
MEANS NO
BATTERIES**

- No maintenance
- No waste
- No opex

Up to 4 Layers of Simple Control

- Operates within the boiler settings to give

1. Schedules & Real-Time Control

Building Manager's dashboard

- Many types of digital calendars for events or periods scheduled by others (eg holidays, voids)

2. Room Booking System Integration

Optional / where appropriate

- Instant touchless control via mobile for occupants to balance comfort and energy savings.

3. In-room QR code

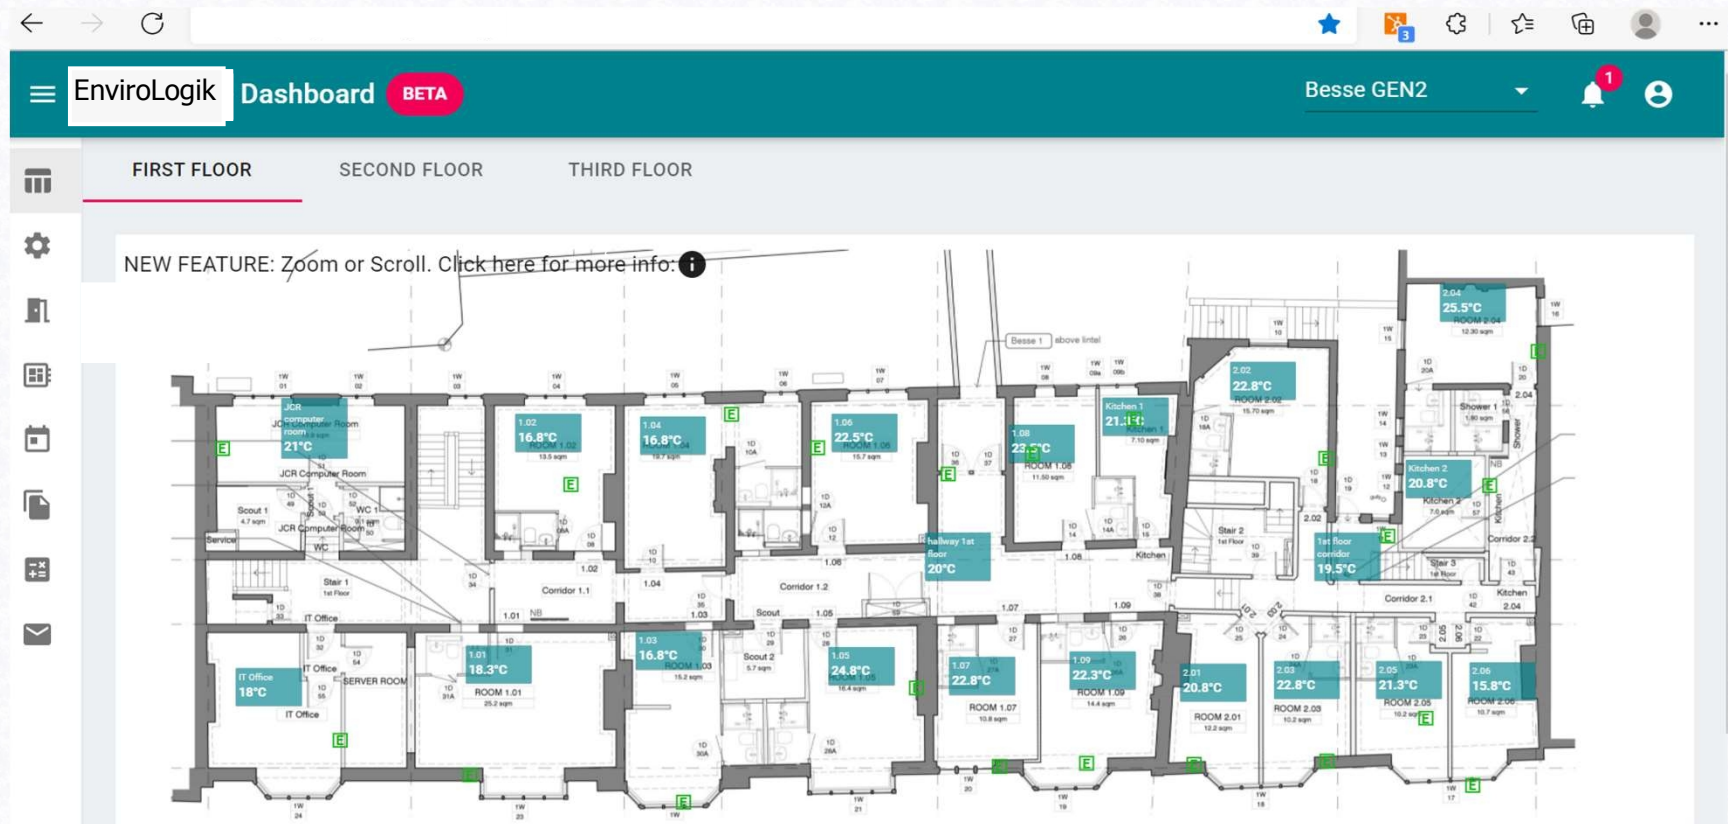

Optional / where appropriate

- Learns true usage patterns of rooms to add layer of predictive heating control without sensors.

4. AI Occupancy Detection

In Room Occupancy monitoring

- Cloud based so accessible from anywhere, anytime.
- Set schedules, monitor, adjust without having to send someone to room.
- Receive alerts and spot anomalies.
- Identify targeted opportunities for capital efficient building fabric upgrades.

CARBON METER FOR VIRTUAL SUB-METERING, BENCHMARKING OR INTER-DIVISIONAL COMPETITION

- Measure energy consumption and carbon by room or groups of rooms
- Measure savings by room or groups of rooms
- Aggregate data across rooms to create sub virtual sub metering based on actual usage rather than floor area, incentivising behaviour change.
- Feedback savings to occupants via webapp to increase engagement and behaviour change.
- Create benchmarking or competition between teams, buildings, organisations.

Energy Usage by Room

Room Name	Consumption / kW...	Baseline / kWh	Saving / %
CAV G01 Principals Office	250.76	333.82	26%
CAV G02 Principals Secretary	222.99	278.88	20%
CAV G07 Office	70.41	106.18	37%
CAV G04 Office	56.26	86.08	32%
CAV G03 Tutor Room	44.41	71.88	41%
CAV G06 Office	34.27	49.52	37%
CAV G05 Office	29.78	39.23	35%
CAV G08 Office	11.46	16.85	37%
CAV G10	9.93	15.49	36%
CAV G13 Office	1.05	1.87	46%

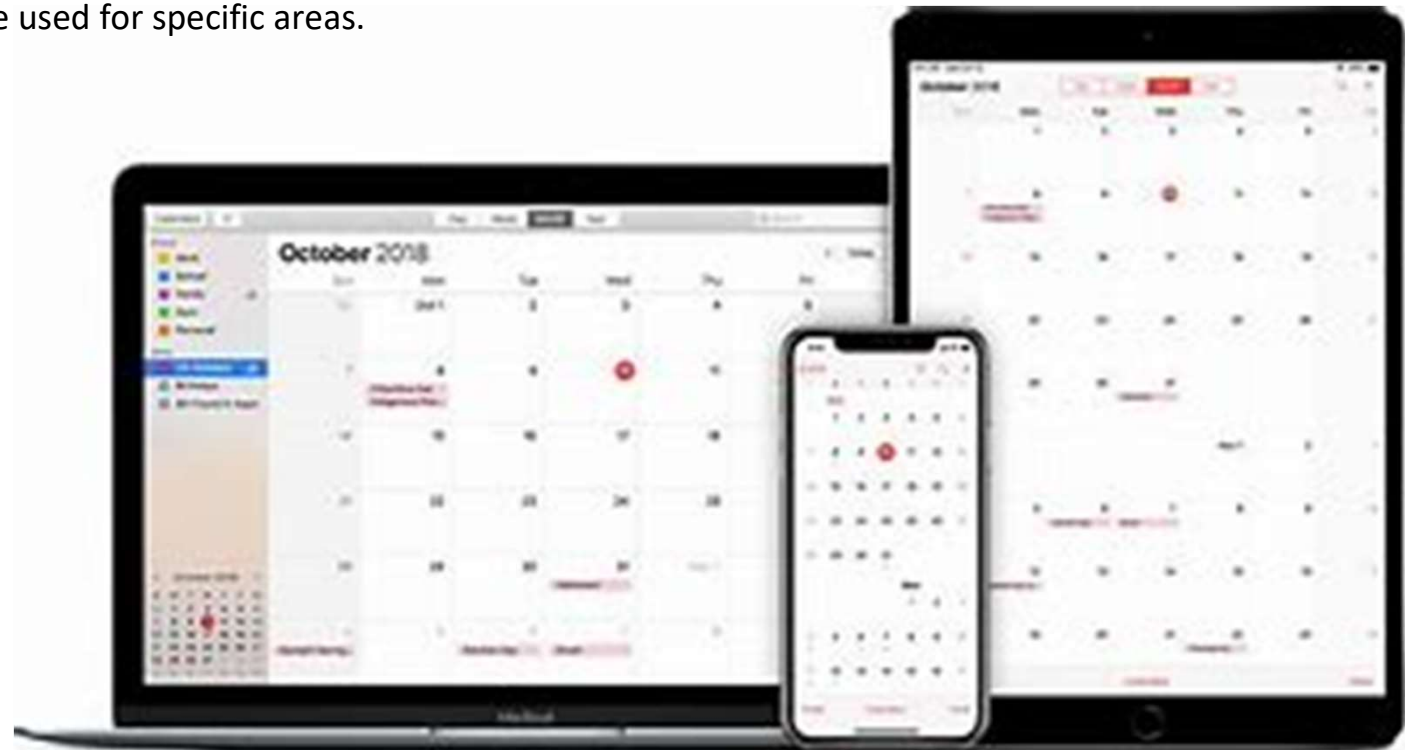

Energy Usage over Time

Synchronises With Room Booking Systems or Calendars

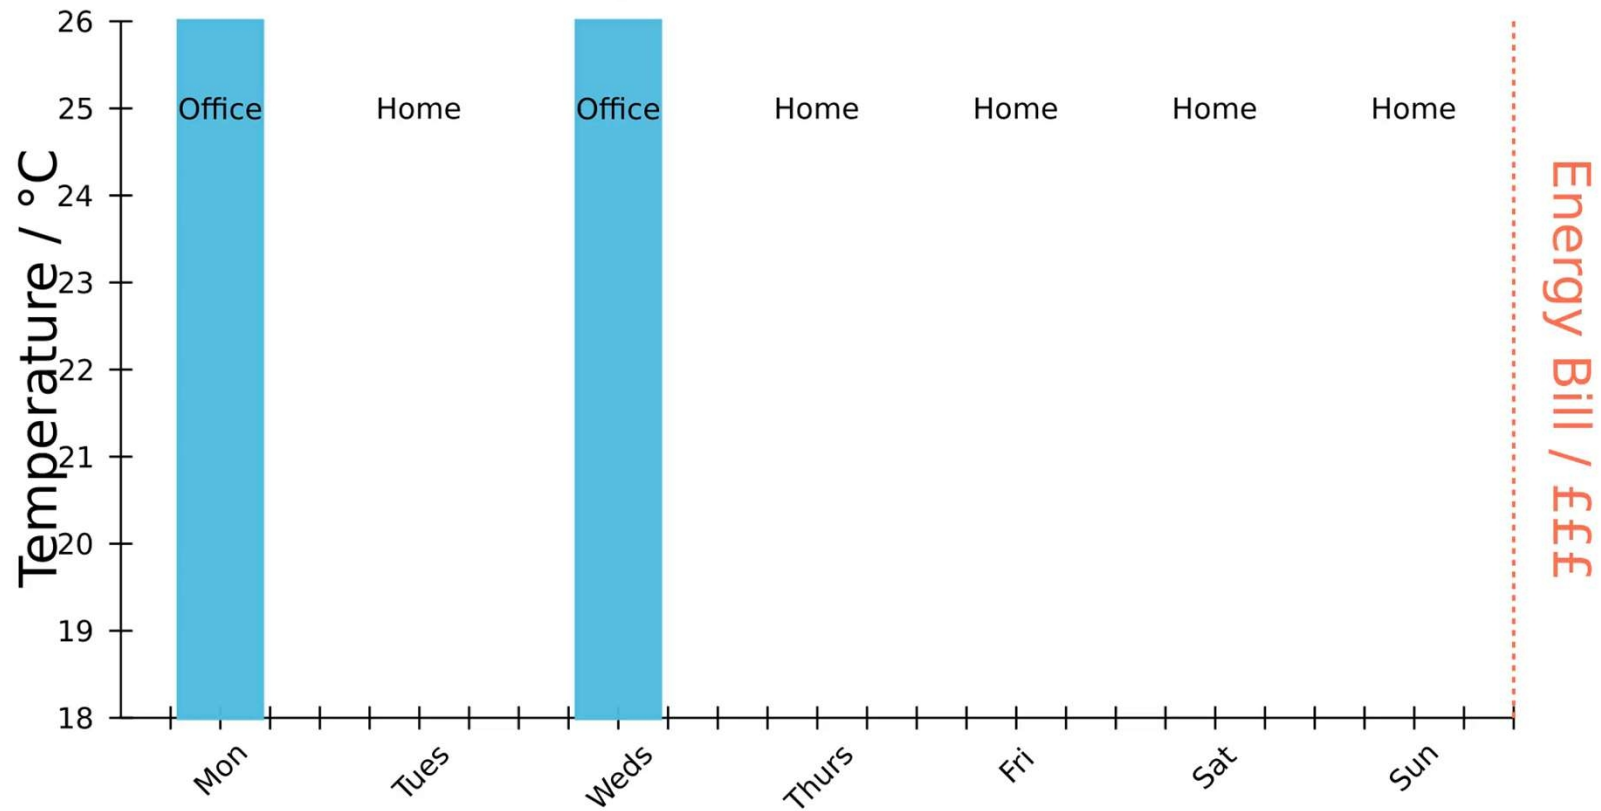

Personal or shared calendars can be used for specific areas.

- Short vacant periods can be set to revert to your preferred “set-back” temperature (eg 16-19 degs C)
- Longer vacant periods can be set to your preferred level of freeze protection (eg 10-15 degs C)

Examples

Heating Empty Rooms without Envirologik

ADDITIONAL VALUE ADDED FEATURES

Preventive Maintenance

Anti-calcification: 6 weekly valve pin movement

Stuck pin alert

Analytics and Reports

Periodic building "healthcheck" reports

Understand building behaviour

Actionable insights

User Behaviour

Use of AWAY setting

High comfort temperatures

Open windows /
Other heat sources (eg electric fires)

Time Saving

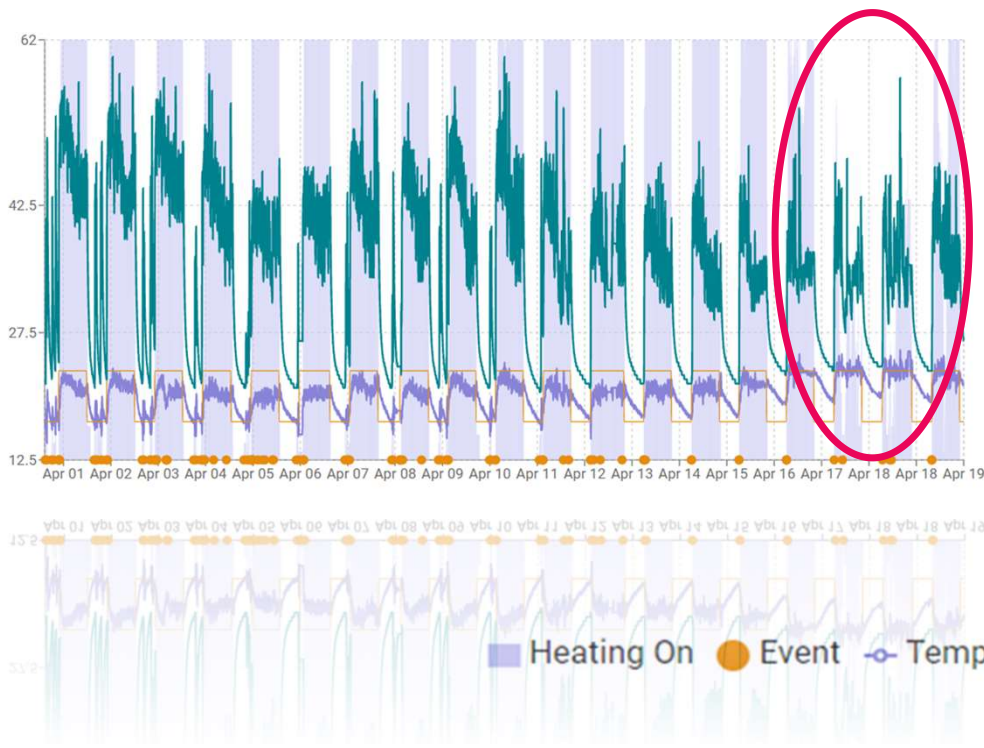

Responding to requests/complaints

Visiting buildings / occupants

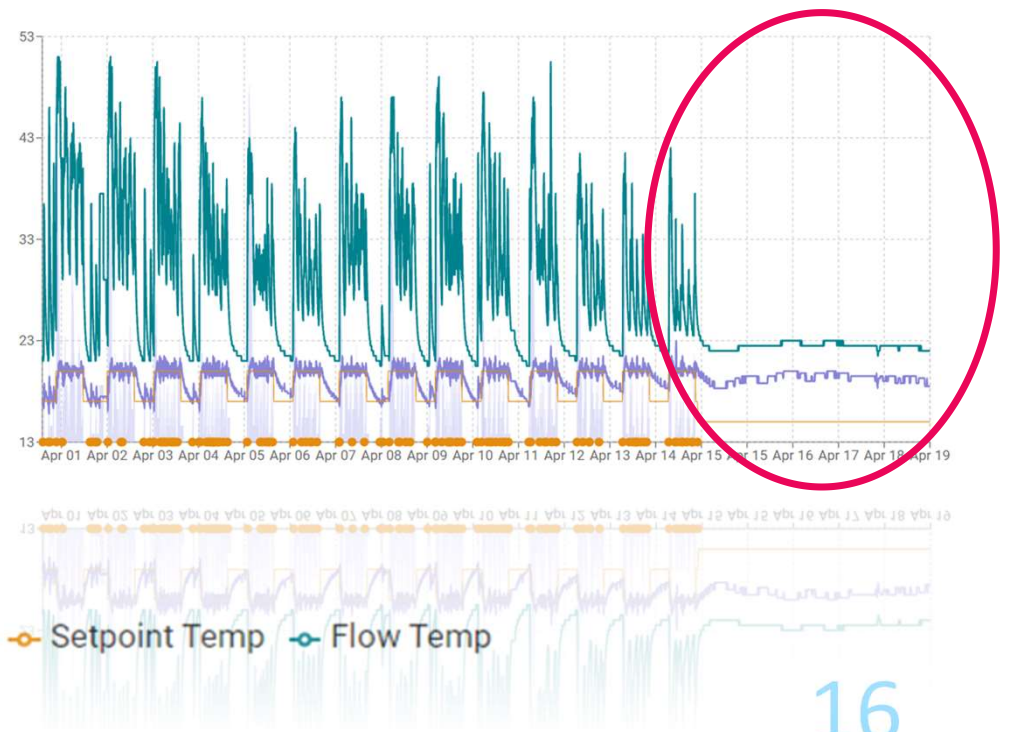

Trying to understand where heating efficiency is
poor

Examples

Room 5: Occupied, window open

Room 7: Occupant activating "AWAY" function to save energy

Validated Case Studies

RESULTS:

1. Comparison to EPC energy efficiency measurements validated a 33% saving
2. Comparison of identical buildings, one with and one without EnviroLogik, showed 45% saving
3. Digital Twin baseline was 95% accurate when compared to heat meter data, showing 53% saving

Simple, Quick Implementation

Complete All-Inclusive Solution

Fees are all-inclusive and cover the following:

One-off		Licence			
All hardware including: <ul style="list-style-type: none"> ➤ Smart TRVs ➤ Communication "gateway" devices ➤ Magnetic activation tools ➤ Manufacturers' Warranties ➤ Delivery to site ➤ Adapters (if required)⁴ 	Onboarding: <ul style="list-style-type: none"> ➤ Site audit ➤ Set up and configuration of the platform and Web App ➤ On-site support for first install ➤ 1-click solution for self install ➤ Video tutorials ➤ Live remote support on install day 	Cloud based platform including: <ul style="list-style-type: none"> ➤ Dashboard control centre ➤ Carbon <u>meter</u> for energy consumption and savings data ➤ Feature upgrades ➤ Software licensing, security updates, maintenance and hosting ➤ 4G backup SIM connection⁴ 	User interface including: <ul style="list-style-type: none"> ➤ QR codes ➤ Web App ➤ Leaderboard ➤ Collateral and communication support for roll-out to building users ➤ Periodic user surveys 	Integrations: <ul style="list-style-type: none"> ➤ Room booking systems⁴ 	Ongoing support: <ul style="list-style-type: none"> ➤ Free unlimited remote support by <ul style="list-style-type: none"> ○ WhatsApp (1 hr); ○ Email (1 day); ○ Portal (1 day) ➤ Periodic data analytics reports

⁴ May be subject to additional fees

EnviroLogik provides..

- High tech but affordable solution
- Advanced room by room control, heat only the rooms in use
- Simple to understand, install and operate
- Helps you to save money, go green & improve manpower efficiency
- You do not have to choose between comfort and energy saving

DO YOU WANT TO STOP HEATING
EMPTY ROOMS?
